Planning Working Group Comment Schedule – May 2023 Update

The following schedule outlines the comments agreed at the meeting of the Planning Working Group which have taken place between April & May 2023.

<u>Ref. No.</u>	<u>Description</u>	<u>Comments</u>	<u>Date Planning Group met</u>	<u>Initials of Cllrs.</u>	<u>Date to Carlisle City</u>	<u>Status of application / Decision</u>
22/0167	Erection Of 1no. Dwelling (Reserved Matters Application Pursuant To Outline Approval 21/0591) Aspens, Rockcliffe, Carlisle, CA6 4BH	With regard to this application KPC are okay with this application as long as there are no trees and hedgerows affected on the common land which surrounds this property and that all proposed work falls with in the existing property boundaries. If there are any trees or hedgerows that need to me moved or cut back then permission must be sought from KPC prior to work being commenced, KPC are happy to meet with the homeowners to discuss this if required.	28.03.22	L.F / P.L / M.K	Returned 29.03.22	Awaiting decision
22/0698	Demolition Of Existing Buildings And The Development Of A New Employment Site Of Up To 102,194 Sqm (1.1m Sq Ft)	Extension requested of 1 week – Granted The site of the above proposed application borders an area of common land referred to as "The Sprinkles" which can be accessed by footpath's 120010 or 12008 via footpath 120007, having	Met 11.10.22	L.F / P.L / M.K	Returned 12.10.22	Awaiting Decision

		<p>development. Can this not be reworked to provide bio fuel? Please kindly refer to Pages 22 to 23 of the submitted Planning Statement that sets out CNG Fuel's site-specific operational requirements for operating a viable Bio-CNG station which has informed the selection of this application site at Chandler Way. As set out within application, the proposed station would be utilised by HGVs already on the highway network in the area, with Bio-CNG offering an alternative fuel that reduces a vehicle's CO2 equivalent emissions by 90%. The station will therefore clearly deliver significant environmental and economic benefits to the local area, including the Primary Employment Area of Kingstown and Kingmoor, as covered further in the</p>

		<p>Planning Statement. The transport assessment modelling is based on a similar site in Warrington, not on the traffic flow on Chandler Way and Parkhouse Road, we find this unacceptable and request that a full assessment is carried out at the location of the proposed development. Please note this method to determine the trip generation of the proposed development within the Transport Assessment (TA) has already been scoped and agreed with the CCC Highway Officer during the highways pre-application exercise. National Highways have also confirmed no objection in their formal consultation response to the application. The assessment was based on the location of the proposed development, with measured traffic data of the Chandler</p>

		<p>Way not have a negative impact for road and pedestrian safety. The bus services wait clear of the Chandler Way carriageway in the Asda bus loop, therefore not impacting the flow of vehicles, and well clear of pedestrians and cyclists. The current servicing that is taking place at adjacent sites as cited above, is beyond control of the Applicant of this application. The road safety data reviewed in the TA shows that firstly there is not an accident trend in the area, and secondly, that the addition of HGVs on a route within a designated primary employment area that is already serviced by HGVs would not be unexpected, and therefore would not lead to an increase in accidents/incidents. The access junctions would be provided with</p>

		<p>dropped kerbs and tactile paving to encourage safe pedestrian access along Chandler Way. These proposed works are shown on the submission drawings. As mentioned in the TA, the incidence of HGV's already attending to sites locally and on the local network strengthens the case for providing a Bio-CNG station on this site. The station would allow these vehicles to swap to a more environmentally friendly fuel source, other than diesel, cleaning up the freight network in the Carlisle area.</p> <p>KPC note that only 3 trees are scheduled to be removed from the site of the proposed development, should this planning be granted then we request that an Arboricultural clerk of works be appointed to ensure that this is adhered too. As required to be demonstrated,</p>

		<p>existing trees within and adjacent to the boundary of the application site are recorded by the submitted tree survey which in turn has informed the proposed layout. All existing trees on the application site are proposed to be retained, with tree retention and protection recommendations that are set out with the submitted Arboricultural Method Statement to be secured via planning condition. We request further information regarding the effect of possible flooding into Kingmoor nature reserve should this application be granted. The site is located within Flood Zone 1, with the development proposals, levels and drainage having been carefully designed to ensure no impact on any potential flooding issues within the area, with no increased runoff</p>

		<p>post-development. This is covered and confirmed by the submitted FRA and Drainage Strategy. The gas to this plant is to be piped in from the existing mains supply we assume that a new pipe line will have to be installed in order to do this and we would like further information on this, showing the exact route of the new pipeline. There will be no laying of a new pipeline, with the Bio-CNG station connecting to the existing pipeline which runs in Chandler Way. CNG Fuels are already liaising directly with Northern Gas Network to work through a Detailed Analysis Study, whereby CNG Fuels will be responsible for a significant upgrade to the local gas pipeline infrastructure that will not only benefit its station but everyone else using gas in the area. The site is to be</p>

		<p>monitored and controlled remotely, this is a safety concern, we request further information regarding emergency protocol. CNG Fuels are responsible and experienced operators, with 10 stations already in operation across the UK. All their sites are monitored from a central control room, with a suite of cameras and sensors employed at stations. The gas connections can be shut off from the central control remotely or automatically via a 'fail safe'. In the unlikely event of any leaks CNG is safer than diesel or petrol as it evaporates into the atmosphere very quickly rather than pooling on the ground as per diesel/petrol. The environmental impact statement says there maybe a detrimental effect on local flora and fauna during construction work. Can the Council please</p>

		<p>clarify what will done to monitor this and what action will be taken should there be a negative impact on the local plant and wildlife. Careful control of construction activities through an industry best practice Construction Environmental Management Plan, alongside the protection measures set out within the Arboricultural Method Statement shall be secured via planning condition, and thereafter implemented and closely monitored during the construction phase. Will the footpath entrance at the bottom of Chandler way into Kingmoor nature reserve still be accessible for cyclists and pedestrians during construction work. Yes, the existing entrance into Kingmoor Nature Reserve at the western end of Chandler Way will remain open to the public.</p>
